Good practice

One of the best practice has been developed in Roma 3 concerns the international awareness in teachers' education. The academic course of Pedagogy included the presentation of the system of education, idea and practice of education in other countries. Students had the opportunity of meeting our colleague from Germany and discuss relevant questions on migration, intercultural education citizenship education. The arguments were chosen allowing students to know the historical perspective of pedagogy in different countries; profile and status of teachers in societies with new policy of education; long life learning as broad area of new European identity. From these experience the students

earned how to open their attention to other cultures and tradition in the field, being capable of critical analysis, evaluation and synthesis of new and traditional pedagogical concepts.

Future plans

- Introducing citizenship education in School curriculum (Infant, Primary, Secondary) in order to contrast bullying and violence in schools.
- New agreements with members of CiCe and finding opportunities of research and sharing academic issues.
- Participation in Regional Conferences on citizenship education and identity.
